

This data was collected between March 25 - March 30, amongst adult Canadians who are eligible likely voters in the 2025 federal election. A total of N=1,734 respondents were surveyed, using a multi-mode methodology of approximately 50% live-interviewer telephone (CATI) and approximately 50% online panel. Our data is weighted by gender, age, and education according to the most current Census figures. In addition, we have weighted age by historical voter turnout rates so that the sample reflects the likely voting electorate.

**Q3 - If election day were today, who would you vote for or lean towards?**
