

Pollara Strategic Insights: BC 2026 Election Syndicate, Wave 3 Final Report: detailed tables

Fielded October 15 to 21, 2026. Mixed-mode survey of BC adults (18+): n=2,202 (1,502 online panel, 700 IVR). Every interview was completed after the October 14 leaders' debate.

Weighted by Logit: region, gender and age (likely electorate), online and IVR separately; online also to 2025 federal vote. Column percentages; figures may not add to 100% due to rounding. A hyphen (-) means zero or under 0.5%.

Online panels cannot be assigned a margin of error; a probability sample of n=2,202 would carry +/- 2.1%, 19 times out of 20, larger for subgroups. * Unweighted base under 100: read with caution.

Regions: Metro Vancouver includes Langley, Maple Ridge, Pitt Meadows, White Rock and the Sea to Sky; Fraser Valley is Abbotsford, Mission and Chilliwack to Hope; Vancouver Island includes the Sunshine Coast and Powell River; Interior / North / Fraser Valley is the rest of BC, including Abbotsford, Mission and Chilliwack to Hope.

Table 3. Projected popular vote (decided vote adjusted for candidates on the ballot)

Decided vote, adjusted for which parties have a candidate in each riding: supporters of a party with no local candidate are moved to their stated second choice (online decided voters, waves 1 and 3 pooled), by subregion, weighted by the share of 2024 valid votes in ridings where each party is running (Elections BC final candidate list). Not a direct survey question.

Base: Decided voters.
